

HEP

International Conference on High Energy Physics and Computational Science

CALL FOR ABSTRACT – HEP

About Conference: High Energy Physics and Computational Science takes the privilege to invite speakers, participants, students, delegates and exhibitors from across the globe to its International Conference. The HEP International Conference is an annual gathering. This conference is a unique international platform that's a meeting of all stakeholders of the Industry, Academia, Researchers, Innovators, Scientist, Regulators coming together to present and discuss technological advances in High Energy Physics. We look forward to personally welcoming you.

Objectives: The International Conference on High Energy Physics and Computational Science is attracting high quality papers in different subfields. Offer the opportunity to be updated on the latest research outputs on several topics. Organize specific workshops around the most attractive and current issues. Gather worldwide experts as conference speakers. More focused sessions that will feature cutting edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

Key Features: Journal Publication in ESCI, Scopus Indexed | Excellent Venue | Inspiring Speakers | Conference Proceedings with ISBN | Best Presentation Awards | Best Poster Awards | Best Paper Awards

Topics of interest include, but are not limited to: Chiral spinors and helicity amplitudes| Chiral symmetry breaking| Effective field theory and renormalization| Electroweak interactions and the standard model| Experimental methods| Free particle wave equations| High energy physics| Interactions and fields| Invariance principles and conservation laws| Lepton and quark scattering| Particle physics and cosmology| Particles and antiparticles| Quark interactions| Spontaneous symmetry breaking| The matter particles| Weak interactions
